SUMMARY

Passionate Frontend Developer skilled in ReactJS, JavaScript (ES6+), and responsive UI design. Experienced in building real-world web apps with authentication, state management, and API integration. Strong focus on writing clean, reusable code and solving problems through hands-on projects.

SKILLS

- Languages: HTML, CSS, JavaScript (ES6+)
- Libraries/Frameworks: React.js
- State Management: useState, useEffect, Context API
- Routing: React Router DOM
- Tools: Git, GitHub, VS Code, Chrome DevTools

PROJECTS

Expense Tracker App
- Simple and responsive expense tracker to manage your daily expenses easily on any device
- User authentication with login/register pages
- Added, edited, deleted expense entries.
- Implemented navigation with React Router and state management with Context API.
- Managed user authentication and data persistence in localStorage.

Tech Stack: React, useState, useEffect, React Router, Context API, localStorage, CSS

Weather App
- Responsive weather app providing real-time weather updates with a mobile-friendly design
- Search city by name
- Displays temperature, humidity, weather condition
- Error handling for invalid city input

Tech Stack: React, useState, useEffect, Fetch API, CSS

Portfolio Website
- Clean and responsive personal portfolio to showcase projects and skills across all screen sizes
- Created a personal portfolio to showcase projects, skills, and contact information
- Designed with scroll-based animations and smooth transitions using CSS & JS
- Ensured a fully responsive design compatible across devices
- Deployed the site on GitHub Pages with a custom domain

Tech Stack: HTML, CSS, React.js, GitHub Pages, Scroll Animations
